NAAHL VENN

HILLEGOM
HOLLAND

Hooggeachte Heren Breck:

It has come true what you predicted in your last year's folder — your customers have reacted in a really American way to your appeal. When their gardens were still reflecting the colors of our beautiful Tulips, and Spring was at its best, they took your advice and reserved their bulbs to plant the next Fall.

"The eye of the master maketh the horse fat" — is an old Dutch saying. Quite simply it means this — that when the master oversees any project, its success can be counted on. Thus we were very glad indeed to greet you again, Heren Breck, here in Holland this year, and to be able to plan and re-plan and discuss with you this 1954 Advance Sale. (We will send shortly pictures of the fine large new packing warehouse we are here now building jointly with you.)

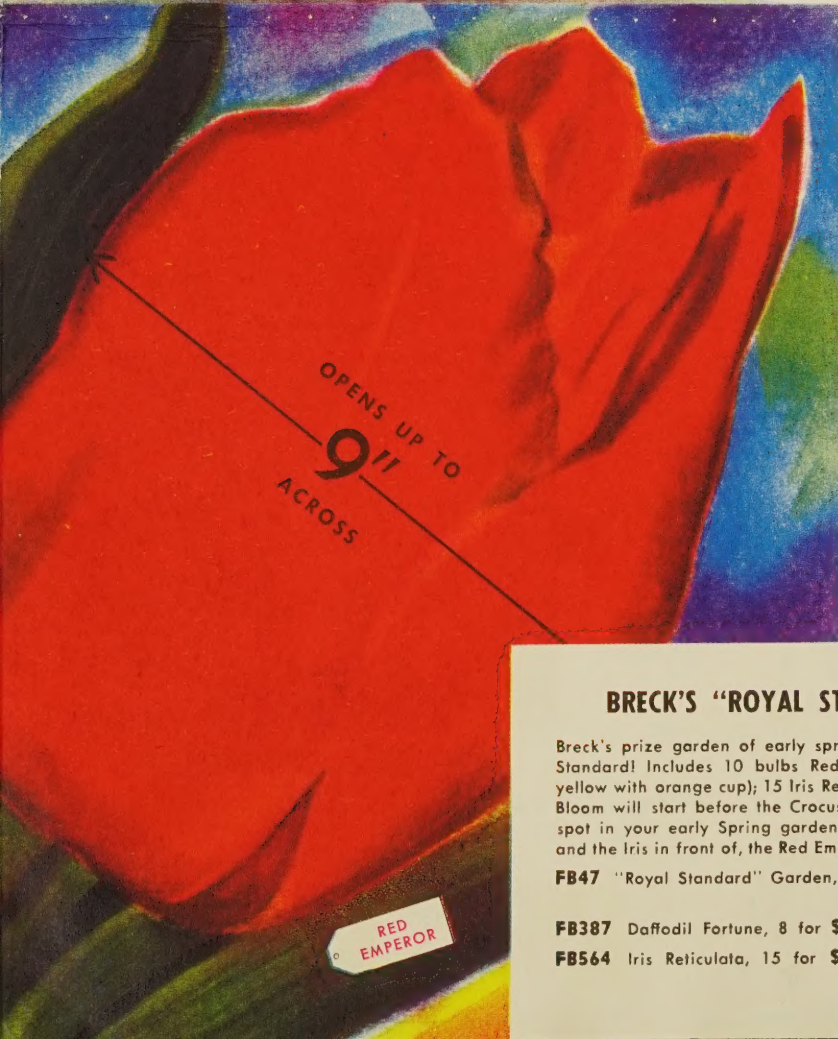

"The way to Aachen could not be built in one day." That is another Dutch saying, which means that the way to perfection develops with experience. And so we hope that you find that this year's brochure, printed and mailed again in Holland, gives your friends a better idea of the colors and the beauty of our flowers than even last year's folder.

After your most recent visit with us, Heren Breck, on behalf of your bulb affairs, we feel again the binding continuity of friendship with all your customers. Would you tell them from us that if they are in The Netherlands this year they are welcome to a visit with us and a tour of our Hillegom bulb-growing fields. If they will present your sale folder, we will know them and extend to them every courtesy.

Met vriendschappelijke groet,

M. Van Waveren

THE WORLD'S LARGEST, EARLIEST TULIP
RED EMPEROR

Just picture this giant Tulip bringing your garden to life with its brilliant scarlet-red color, even before the Crocuses fade. Yes, here's a gorgeous Tulip that actually blooms before and with the Daffodils and Hyacinths — the only large Tulip to flower so early. The blooms are really immense — up to 9" across — supported on sturdy 15" stems. The color is truly spectacular too, much more glowing than we could show here — a shining vermilion-scarlet that gives a fluorescent effect in the sunshine. And when the large streamlined petals open wide, they display a bright yellow center with shining black border. A group of these, blooming so early in the year, is a breathtaking sight, a stoplight to any passerby. Next fall this variety will be sold in catalogs all the way to \$20 per hundred. They are scarce and dear, more so each year. Breck's Red Emperors are top-quality re-selected stock, guaranteed true to name. Why not order a hundred or more for brilliant mass effects?

SCARLET
DELIGHT

SCARLET DELIGHT

Nature well knows our fascination for the color red — see her gaudy sunsets, her autumn woodlands, and now — the flamboyant shockingly-brilliant Scarlet Delight Tulip. Its bowl-shaped bloom will delight your garden, indeed, with its splash of flaming color. A tall, sturdy, early-flowering bloom. About 24" tall.

FB169 14 for \$1.00; 28 for \$1.98; 100 for \$6.79

CARRARA

CARRARA

Named Carrara because its blooms are reminiscent of famous Carrara marble — a gleaming alabaster white! Each bloom is a standard of excellence for any other May-flowering Tulip in your garden. Its yellow anthers insure against spotting or staining; it reaches a towering height of 29". Most popular of all the white Giant Tulips!

FB184 14 for \$1.00; 28 for \$1.98; 100 for \$6.79

QUEEN OF
THE NIGHT

She'll reign in your garden as a true queen, for she's robed in royalty's colors — her flaring goblets are a deep rich maroon. And they're as soft to touch as any regal robe of velvet. Blooming in May, she commands a majestic height of 29". A bit like the familiar Black Tulip but much, much finer.

NEW!

X-RAY TREATED HYBRID TULIPS

The miracle of X-Ray and the skill of a young Dutch schoolteacher gives you garden Tulips so strange in pattern, so new in form and color, that you have never seen them anywhere before — even in your dreams! Until a short time ago, these Tulips simply did not exist, and would never have been created at all if a teacher in the town of Lisse had not experimented with the effects of X-Ray irradiation on healthy Tulip bulbs. The X-Ray jumbled, split up, and then re-combined the chromosomes in the bulbs, and when they burst into bloom, the young teacher beheld in amazement and delight flowers that were doubled in size, blooms with unique shapes, others with curious fringed petals, still others with rare fragrance. There were thousands from which to choose, and a few were named and registered. Four years ago, a hatful of a strikingly clear yellow variety was traded for a new Cadillac! The stock of unnamed seedlings has now become a burden of expense to the schoolteacher, and he has decided to offer a part of the stock to Breck's. Plant in groups of 3 or 6. 22 to 26 inches tall.

Yes, at the first hint of a warm Spring sun, they open your outdoor garden season with bright flags of color that wave defiantly in the face of chill April winds or even late snow! Their gold, lilac, purple, white and pertly-striped blooms refuse to be discouraged — they're a kaleidoscope of color to delight the young, the old and the winter-weary. Plant them this Fall, and for years to come these hardy little harbingers of spring will multiply and bloom faithfully. We offer fine large bulbs in a blend of all the gay colors.
